Suppl.      Numbers of Recipients and Amounts of Medical Vendor Payments  
                 Under Public Assistance Programs  
                 Calendar Year 1968

The data in this report supplement those published earlier in NCSS Report B-4(CY 68). The additional information included here reflects largely the variations in utilization and costs of services by age and place of residence of recipients.

Because of incomplete reporting by States, totals on many of the tables in this report (or data from which averages and the like were derived) are smaller than comparable quantities included in NCSS Report B-4(CY 68). Such differences are unrelated to the minor variations resulting from the rounding of data in the earlier report. However, the number of recipients reported by age and place of residence (10,704,457), for example, represented 88 percent of the 12,194,000 included in the aforementioned report. Averages, percentage distributions, etc., that have been developed probably do not vary greatly from measures that might have been obtained from complete data, and they should be of value.

The following highlights are based on the tables included in this report.

Recipients and payments

- Two-thirds of all medical recipients lived in Standard Metropolitan Statistical Areas (SMSA)<sup>1/</sup> but their medical payments represented three-fourths of the total (Tables 28 and 29).
- Four out of 10 recipients (39 percent) lived in central cities of 400,000 population or more (based on the 1960 Census), and half of those living in such cities were under age 21 (Table 28). This was partly a reflection of the concentration of AFDC recipients in metropolitan areas.
- About one-fourth of all recipients were age 65 or over. By place of residence they were fairly evenly distributed between cities of 400,000 or more, other SMSA areas, and outside SMSA's, with the largest proportion outside SMSA's (Table 28).
- Almost half (47 percent) of all recipients were under age 21, but their payments were only 17 percent of the total. One-fourth (26 percent) of all recipients were age 65 or over, and their payments were 52 percent of the total (Tables 28 and 29). The following tabulation shows the differences between proportions of recipients and of medical payments in their behalf, by age and place of residence. For this comparison recipients and payments are distributed by age within each place of residence (i.e., each place of residence is a 100 percent distribution). A plus sign, "+", indicates that

---

<sup>1/</sup> See page 6 for definitions

the recipient percentage is greater than the payment percentage and a minus sign, "-", indicates the reverse. For example, medical recipients under age 21 represented 49.8 percent of all medical recipients in cities of 400,000 or more, and payments for the group were 18.1 percent of total payments in those cities. The recipient percent exceeded the payment percent by 31.7. (See Table A for full detail.)

Residence	Age		
	Under 21	21-64	65 and over
Cities of 400,000 or more	+31.7	-2.6	-29.1
Other SMSA	+29.7	-3.7	-26.0
Not in SMSA	+30.3	-4.5	-25.8

The following tabulation is similar but with recipients and payments distributed by place of residence within each age group (i.e., each age group is a 100 percent distribution). For example, medical recipients under age 21 who lived in cities of 400,000 or more represented 41.1 percent of all recipients in that age group, and payments for these city recipients were 47.5 percent of all payments for recipients under age 21. The recipient percent was less than the payment percent by 6.4. (See Table B for full detail.)

Age	Residence		
	Cities of 400,000 or more	Other SMSA	Not in SMSA
Under 21:	-6.4	-2.0	+8.4
21-64	-3.2	-2.6	+5.8
65 and over	-9.6	-1.5	+11.1

These tabulations show that the proportions of recipients under age 21 are considerably greater than their medical payment proportions in each place of residence. On the other hand, the proportions of recipients age 65 and over are considerably less than their payment proportions in each place of residence. Within each age group the recipient proportions are less than payment proportions in metropolitan areas, but more outside the SMSA's. These variations are, in turn, reflected in the average payment per recipient. In summary, these data show that medical costs vary noticeably between urban and other areas, and among the various age groups.

Table A. Percentage distribution of recipients and payments by age of recipient within specified places of residence, 32 reporting States, 1968

Residence and item	Age			
	Total	Under 21	21-64	65 and over
Cities of 400,000 or more:				
Recipients	100.0	49.8	28.8	21.4
Payments	100.0	18.1	31.4	50.5
Other SMSA:				
Recipients	100.0	45.6	27.7	26.7
Payments	100.0	15.9	31.4	52.7
Not in SMSA:				
Recipients	100.0	45.7	24.7	29.6
Payments	100.0	15.4	29.2	55.4

Table B. Percentage distribution of recipients and payments by place of residence within specified age groups, 32 reporting States, 1968

Age and item	Residence			
	Total	Cities of 400,000 or more	Other SMSA	Not in SMSA
Under age 21:				
Recipients	100.0	41.1	27.2	31.7
Payments	100.0	47.5	29.2	23.3
Age 21-64:				
Recipients	100.0	41.5	28.7	29.8
Payments	100.0	44.7	31.3	24.0
Age 65 and over:				
Recipients	100.0	32.7	29.4	37.9
Payments	100.0	42.3	30.9	26.8

### Average payments

- . With one exception (adults in families with dependent children) the average medical payment per recipient for each basis of eligibility (age, blindness, etc.) was more for those who did not receive maintenance money payments than for those who did (Table 31). Among the reasons for higher payments for those not receiving maintenance money payments was the larger proportion of recipients with nursing home care--an expensive service--particularly in States that had not yet started title XIX programs (Tables 46 and 47).
- . The average payment per recipient may be characterized as increasing with age of the recipient and with the urbanization of his place of residence. The highest average was for recipients age 65 or over living in cities of 400,000 or more (\$804) and the lowest average was for recipients under age 21 living outside SMSA's (\$79) (Table 34).
- . Average payments reflect, at least in part, some of the effects of Medicare on Medicaid. As indicated above, one would normally expect average payments for recipients age 65 or over to be greater than those for younger persons. Overall, this is true, but the average payment for inpatient care in a general hospital for recipients age 21-64 was \$806; for recipients age 65 and over the average was \$600 (Table 41). For physicians' services the respective averages were \$92 and \$57 (Table 39). In both these examples the services are covered by both Medicare and Medicaid. For prescription drugs which are not covered by Medicare, on the other hand, the average payment per recipient age 21-64 was \$44 and for recipients age 65 and over it was \$78 (Table 40). For each of the above types of services the average payment for recipients under age 21 was lower than those for the other age groups.

### Percentage distributions

- . In the distribution of recipients by age by place of residence the largest group was recipients under age 21 living in cities of 400,000 population or more (19.4 percent of the total). The smallest group (7.5 percent) was recipients aged 65 or over living in SMSA's but not in cities of 400,000 or more (Table 49).
- . About 1 percent of medical recipients were under 1 year of age and 5 percent were age 85 or over (Table 48).
- . Out of each 100 recipients, 62 received physicians' services, 56 received prescribed drugs, 22 received outpatient hospital services, 16 received inpatient hospital services, and 15 received dental services (Table 50.) These items cover the largest groups of recipients, but they do not cover all types of services. In States that had not started medicaid programs relatively more recipients received prescribed drugs, inpatient hospital services, and nursing home care than in medicaid States, and relatively fewer were reported as

receiving physicians' services. The low proportion reported for physicians' services in the 11 reporting States that did not have medicaid programs (30.5 percent) was partly because five of such States did not pay for that type of service. Further, only three of the six States that reported payments for physicians' services showed that more than one-third of the recipients received such care.

- . Relatively more recipients with maintenance money payments received inpatient hospital services, physicians' services, outpatient hospital services, and prescribed drugs, but a higher proportion of recipients without maintenance money payments received skilled nursing home care (Tables 46 and 47).
- . A larger proportion of recipients under age 21 received physicians' services (68 percent) than recipients aged 21-64 (62 percent) or those age 65 or over (57 percent) (Tables 51, 52, and 53).

#### Units of service

- . Data on hospital discharges and days of care were reported only for recipients under age 65. Of the 34 States reporting, almost half (47 percent) were under age 21, and their days of care represented 36 percent of the total (Table 57).
- . Hospital stays were also reported only for recipients under age 65. Stays of 1 day represented 9 percent of total episodes; stays of 1, 2, or 3 days represented 38 percent of the total; and stays of 10 days or less represented 76 percent of the total (Table 58).
- . On the average, recipients of skilled nursing home care had payments made for 195 days of care (median number 182), but almost one-fifth (18.6 percent) of the recipients of such care remained in the home throughout the year (Table 59).
- . Physicians' visits with recipients under age 21 were primarily office visits (66.2 percent), but for recipients age 65 and over office visits represented less than four out of ten (37.4 percent). Relatively high proportions of visits with recipients age 65 and over were in hospitals (28.1 percent) and nursing homes (17.1 percent) (Table 63).
- . More than half of all physicians' visits reported as taking place in the home, in hospitals, in other clinics, in nursing homes, and in "other" locations were with recipients age 65 or over (Tables 61, 62, and 63).
- . Recipients age 50 or over averaged about one physician's visit per month. (Table 64).

- More than half (54 percent) of the recipients who received prescribed drugs had five or fewer prescriptions. In general, however, the number of prescriptions increased with the age of the recipient. Of recipients age 65 or over, more than one in five (22 percent) had more than 30 prescriptions, and one in ten had more than 50. (Tables 67, 68, and 69).

### Interpretations and definitions

In tables showing numbers of recipients, a total represents the unduplicated number of persons for whom medical vendor payments for one or more types of care were made during the period. Ordinarily the sum of the numbers receiving different types of care will exceed the unduplicated total because some persons received more than one type of care.

Amounts of payments include only payments made directly to the provider of service. Premium payments made under Part B of title XVIII, the supplementary medical insurance provisions of Medicare, are not included.

Broadly defined, a Standard Metropolitan Statistical Area (SMSA) is an integrated economic and social unit with a recognized large population nucleus. Each SMSA must contain at least one city of 50,000 inhabitants or more, or two cities (the smaller must have at least 15,000 population) having contiguous boundaries and a combined population of at least 50,000. The SMSA includes the county (town in New England) containing the central city, and adjacent counties that are metropolitan in character and a part of the integrated economic and social unit.

Abbreviated definitions of the types of services for which data are reported are:

Inpatient hospital services - All items of care furnished to an inpatient and covered by the hospital's bill.

General hospital - A hospital maintained primarily for inpatient care of acute illness or injury and for obstetrics.

Mental hospital - A hospital primarily engaged in providing psychiatric services for the diagnosis and treatment of mentally ill persons.

Tuberculosis hospital - A hospital primarily engaged in providing medical services for the diagnosis and treatment of tuberculosis.

Nursing home services - All services furnished to inpatients of, and billed for by, a licensed or formally approved nursing home.

Skilled nursing home or extended care facility - A licensed or formally approved facility that meets specified conditions relating to the supervision of medical care by a physician, adequacy and quality of nursing services, and the like.

Other nursing home - A licensed or formally approved facility which provides nursing home services that do not meet the standards prescribed for a skilled nursing home or extended care facility.

Physicians' services - Services provided by an individual licensed under State law to practice medicine or osteopathy. Services covered by hospital bills are not included.

Dental services - Services, including ancillary services, provided by a dentist in the practice of his profession.

Other practitioners' services - Services of licensed practitioners other than physicians and dentists.

Outpatient hospital services - Services furnished to outpatients by a hospital.

Clinic services - Services furnished to outpatients by a facility which is not part of a hospital, but which is organized and operated to provide services to outpatients.

Laboratory and radiological services - Professional and technical laboratory and radiological services provided in an office or similar facility (other than a hospital outpatient department or clinic) or by a qualified laboratory.

Home health services - Services furnished a patient in his home, including: intermittent or part-time nursing services provided by a home health agency, or by a registered professional nurse or licensed practical nurse; medical supplies, equipment, and appliances for use in the home; and services of a home health aid.

Prescribed drugs - Drugs dispensed by a licensed pharmacist on the prescription of a practitioner licensed by law to administer such drugs, and drugs dispensed by a licensed practitioner to his own patients. This item does not include a practitioner's drug charges that are not separable from his other charges, or drugs covered by a hospital's bill.

Other care - Any medical or remedial care not covered by the above.

## INDEX

### Table Number

#### Recipients and payments

- 27 Recipients by age
- 28 Recipients by age and place of residence
- 29 Payments by age and place of residence
- 30 Recipients and payments by title XVIII deductibles and coinsurance

#### Average payments

- 31 For recipients, by basis of eligibility and money payment status
- 32 For recipients for whom money payments were authorized, by type of vendor providing care
- 33 For recipients for whom money payments were not authorized, by type of vendor providing care
- 34 For recipients by age and place of residence
- 35 For recipients by type of vendor providing care
- 36 For recipients under age 21, by type of vendor providing care
- 37 For recipients aged 21-64, by type of vendor providing care
- 38 For recipients aged 65 or over, by type of vendor providing care
- 39 For recipients of physicians' services, by age and place of residence
- 40 For recipients of prescribed drugs, by age and place of residence
- 41 For recipients of inpatient care in general hospital, by age and place of residence
- 42 For recipients of care in skilled nursing home, by age and place of residence

- 43 For recipients of dental services, by age and place of residence
44. For recipients of outpatient hospital services, by age and place of residence

Percentage distribution of recipients

- 45 Recipients by basis of eligibility and money payment status
- 46 Recipients for whom money payments were authorized, by type of vendor providing care
- 47 Recipients for whom money payments were not authorized, by type of vendor providing care
- 48 Recipients by age
- 49 Recipients by age and place of residence
- 50 Recipients by type of vendor providing care
- 51 Recipients under age 21, by type of vendor providing care
- 52 Recipients aged 21-64, by type of vendor providing care
- 53 Recipients aged 65 or over, by type of vendor providing care
- 54 Payments, by basis of eligibility and money payment status of recipient
- 55 Payments by age and place of residence of recipients
- 56 Payments by type of vendor providing care

Institutional services

- 57 Recipients under age 65 discharged from general hospitals, number of discharges, and number of days of care paid for
- 58 Discharges from general hospitals of recipients under age 65, by days of care paid for
- 59 Recipients of skilled nursing home care, by days of care

Physicians' services

- 60 Recipients of physicians' visits, by age
- 61 Physicians' visits with recipients under age 21, by place of visit

- 62 Physicians' visits with recipients aged 21-64, by place of visit
- 63 Physicians' visits with recipients aged 65 or over, by place of visit
- 64 Average number of physicians' visits, by age of recipient

Prescribed drugs

- 65 Recipients with prescribed drugs, by age
- 66 Average number of drug prescriptions, by age of recipient
- 67 Distribution of recipients under age 21 with prescribed drugs, by number of prescriptions
- 68 Distribution of recipients aged 21-64 with prescribed drugs, by number of prescriptions
- 69 Distribution of recipients aged 65 or over with prescribed drugs, by number of prescriptions

## Annotations, Supplementary Medicaid Tables 27-69, 1968

### General

---Data not reported or service not provided

\*\*\*Not computed; base too small

Z Less than 0.05 percent

### Recipients and payments, averages, and percentage distributions

1. Data for Colorado and Pennsylvania are not included; States did not report.
2. Data for Utah cover only 11 months, February-December 1968.
3. Data for Texas do not include recipients in institutions for the mentally retarded (5,400 recipients; \$7,577,000 expenditures).
4. Total expenditures include amounts paid to organized outpatient clinics and for hospital retroactive adjustments in Oklahoma (\$2,812,856), not distributed in detail of tables.
5. For tables showing age distributions, totals do not include recipients of unknown age: New Mexico, 1,325; Rhode Island, 9,597; and North Carolina, 857. Total includes 5,010 recipients in Texas not identified by age.
6. For tables showing payments by age of recipient, totals do not include expenditures for recipients of unknown age: New Mexico, \$75,941; Rhode Island, \$2,706,000; North Carolina, \$264,277. Total includes \$8,057,998 in Texas not identified by age or place of residence of recipient.
7. For tables by age and place of residence, Honolulu, Hawaii, and Portland, Oregon, are included with cities over 400,000, although their populations were less than 400,000.
8. Averages and percentage distributions are based on totals that exclude any incomplete segment of data.

### Type of services

9. In New Mexico, South Dakota, Minnesota, and Tennessee data combined for two or more types of services.
10. For Wisconsin, mental hospitalization includes data for AFDC recipients in State colonies for the mentally retarded.

11. Discharges of recipients under age 65 from general hospitals, by days of care paid for, include 81,810 discharges in Puerto Rico, for which detail by days of care was not reported.
12. Recipients of skilled nursing home care, by days of care, do not include recipients for whom number of days of care was unknown; New York 14,300, Rhode Island 84, Texas 192, and Wisconsin 2,700. For Florida, data include 4,900 recipients in non-skilled nursing homes.
13. In some States number of recipients with physicians' visits is less than the number reported with physicians' services because some physicians charge on a flat fee basis and visits are not specified.
14. Recipients with prescribed drugs, by age, do not include some recipients in New Mexico, North Dakota, Rhode Island, and Wisconsin for whom number of drug prescriptions and/or age were unknown.

TABLE 27. RECIPIENTS, BY AGE, BY STATE, 1968  
(See annotations following table 69  
for variations in State data.)
